Instructor:
Michael Eisenbise

**Former BP Principal Reliability Engineer for
BP Refining-Retired.**

Reliability Process Implementation Specialist
40+ Years Experience in Maintenance & Reliability

Michael has 43 years of maintenance technology and reliability experience.

Eisenbise is a Certified Maintenance and Reliability Professional (CMRP) with the Society for Maintenance and Reliability Professionals Certifying Organization (SMRPCO), a Certified Plant Engineer (CPE) with the Association of Facility Engineers (AFE), a Certified Plant Maintenance Manager (CPMM) with the AFE, and a Certified Reliability Leader (CRL) with the Association of Asset Management Professionals. He is a registered Professional Engineer (PE) in Florida.

Eisenbise holds a Bachelor's Degree in Engineering, a Master's Degree in Mechanical Engineering from Tennessee Technological University, and a Master's Degree in Maintenance and Reliability from Monash University in Australia.

Michael is a former Chairman of the Society for Maintenance and Reliability Professionals. (SMRP) and, current Chairman of the Houston Chapter of the Society of Reliability Engineers, and Regional Vice President for the Association of Facility Engineers – Region 9.

Course Description

Companies today face increasing competition and decreasing margins in the global arena. A culture combined with visionary leadership, relentless pursuit of process and cost reduction done right are the ingredients required for survival and growth. Equipment must be safe, reliable, and process variability must be eliminated. Your employees must be motivated and supported with targeted training and a robust and efficient organizational structure. This course is designed to heighten the learning experience and to provide an immersive training environment that maximizes the interaction between attendees and the instructor, and between the attendees their peers.

Certification

The Certified Maintenance & Reliability Professional (CMRP) program is the #1 leading credentialing program for certifying the knowledge, skills, and abilities of maintenance and reliability professionals worldwide. The CMRP is accredited by the American National Standards Institute (ANSI), which follows globally recognized ISO standards for its accreditation and processes. Earning this certification means earning a coveted credential recognized across all industries internationally.

To register for CMRP exam, click on the below link and follow the on screen instructions.

Training Methodology

Classroom lectures with relevant and upto date case studies and exercises.

Learning Objectives

- Improve your understanding of the best practices of Maintenance and Reliability centered around the SMRP's 5 pillars of excellence
- Define Known Maintenance and Reliability Best Practices
- Develop maintenance leading and lagging KPIs for an Organization
- Define the Maintenance Planning and Scheduling Process
- Develop a PM Procedure`
- Define failures modes for specific components and assets
- Learn what works and what does not working regard to improving equipment reliability

Who Should Attend?

- Maintenance Managers
- Maintenance Superintendents
- Maintenance Engineers
- Maintenance Planners
- Reliability Engineers
- Plant Managers
- Engineering Managers
- Manufacturing Managers
- Production Managers
- Operations Managers
- Asset Managers

Course Duration

24 hours spread over 3 days

Day 1

09:00 - 10:30

🕒 90min

Course Overview

- Safety - What to do in an emergency
- Introduction of Speaker
- Interactive test
- Introductions and course objectives & Course Overview

10:30 - 10:45 Coffee Break

🕒 90min

10:45 - 11:45

🕒 60min

BOK Pillar 1: Business & Management

- Strategic versus tactical planning
- Creating strategic direction & plan
- Developing the business case
- Develop tactical plan
- Creating measurement and performance evaluation

11:45 - 11:55 Short Break

🕒 10min

11:55 - 13:00

🕒 65min

BOK Pillar 1: Business & Management (Continued)

- Elements of a Plan
- Managing change (Discuss 7 steps of change and system not analyzing itself.)

13:00 - 14:00 Lunch

🕒 60min

14:00 - 14:15

🕒 15min

BOK Pillar 1: Business & Management (Continued)

- Maintenance and Operations performance agreements

14:20- 14:55

🕒 35min

BOK Pillar 2: Manufacturing Process Reliability

- Understanding the manufacturing process & Implementing process/continuous improvement
- (Discuss talking to operators and vulnerability study)
- Barringer Process Reliability - plotting and benchmarking
- Manufacturing effectiveness techniques (die exchange)
- Safety, Security, Health, and Environmental (SSHE) issues (Discuss safety pyramid)

14:55- 15:30

🕒 35min

BOK Pillar 3: Equipment Reliability

- Maintenance and Reliability Pyramid (Distribute SAMI pyramid)
- Determining process and equipment performance expectations
- Establishing a maintenance and reliability strategy to assure performance goals (Include equipment reliability strategy and asset health monitoring)

15:30 - 15:45 Coffee Break

🕒 15min

15:45- 17:00

🕒 75min

BOK Pillar 3: Equipment Reliability

- Equipment hierarchy validation
- Equipment criticality vs equipment risk
- Basic elements of a maintenance strategy - lubrication plan

🕒 17:00

Close of the day 1

Day 2

09:00 - 10:30

⌚ 90min

BOK Pillar 3: Equipment Reliability (Continued)

- FMEA/FMECA
- RCM to include CBM/PdM
- RCA
- 5 Why's
- Basic elements of a maintenance strategy - Failure mode based maintenance

10:30 - 10:45 Coffee Break

⌚ 15min

10:45 - 11:45

⌚ 60min

BOK Pillar 3: Equipment Reliability (Continued)

- Basic elements of a maintenance strategy - Precision maintenance
- Writing effective PMs
- OEE
- Establishing policies and procedures
- Asset health monitoring

11:45 - 11:55 Short Break

⌚ 10min

11:55 - 13:00

⌚ 65min

BOK Pillar 3: Equipment Reliability (Continued)

- Cost-justifying the proposed equipment reliability plan
- FRACAS
- RBD and RAM Modeling

13:00 - 14:00 Lunch

⌚ 60min

14:00 - 14:45

⌚ 45min

BOK Pillar 4: Organization & Leadership

- Determining organizational requirements
- Analyzing organizational capability

- Personnel development/developing competency based learning
- Leadership development and growth
- Communicating maintenance and reliability plan to the organization

14:45 - 15:30

⌚ 45min

BOK Pillar 5: Work Management

- Identifying work
- Developing a work prioritization system
- Effectively planning work - backlog management
- Effectively planning work - kitting
- Effectively planning work - shutdown turnaround (STO) planning

15:30 - 15:45 Coffee Break

⌚ 15min

15:45 - 17:00

⌚ 75min

BOK Pillar 5: Work Management (Continued)

- Effectively scheduling work
- Documenting work execution
- Analyzing work history and following up
- Craft Productivity
- Planning and executing capital projects
- Effectively utilizing work management technology - CMMS/EAM systems
- Effectively utilizing work management technology - Data mining systems
- Effective materials management

⌚ 17:00

Close of the day 2

Day 3

09:00 - 10:30

⌚ 90min

Other maintenance and reliability topics

- Maintenance metrics and formulas
- Maintenance and reliability definitions

10:30 - 10:45

Coffee Break

⌚ 15min

10:45 - 12:00

⌚ 75min

Other maintenance and reliability topics

- Reliability in Design
- Teams
- TPM
- 5's
- Crow AMSAA

12:00 - 13:00 Lunch

⌚ 60min

13:00 - 14:30

⌚ 90min

Other maintenance and reliability topics

- Weibull Analysis
- Condition Maintenance Techniques

14:30 - 16:00

90min

- Question & Answers Session

Close of the day 3

Maintenance Planning Scheduling & Control

Facilitator : **Dave Dyer**

Date : **16 - 20 September 2024**

Timings : **10:00 to 14:45 Eastern Standard Time (EST)**
15:00 to 19:45 Greenwich Mean Time (GMT)

This online course is based on an integrated maintenance model that has been used by leading companies and consultants with success and recognised as best practice. Participants will learn the total impact that maintenance can have on a business, identify key elements (and value) of effective maintenance for their own plants to not only reduce costs but also improve performance.

Dave Dyer the facilitator of this course is a highly experienced in maintenance improvement, change management, continuous improvement and capability development as a management coach and trainer. He has worked internationally across Europe, America, the Middle East and Africa with extensive experience in Oil and Gas, the Chemicals sector and manufacturing as well as working with clients in Steel and Power

SAP Maintenance

Facilitator : **Greg Olynyk**

Date : **07 - 10 October 2024**

Timings : **09:00 to 13:00 Eastern Standard Time (EST)**
13:00 to 17:00 Greenwich Mean Time (GMT)

This 4 Day online course provides an overview of SAP Asset Management, Master Data Management, and Plant Maintenance. You will learn about asset structures and review common transactions that are essential to Plant Maintenance. By the end of this course, you will be able to perform preventative and corrective maintenance, manage master data as well as transactional data such as notifications and work orders.

Greg Olynyk is a senior SAP consultant and educator, with more than a 30+ years' experience in software course design and instruction. Since 2003, he has specialized in SAP PM and Document Management in regards to instructional design and delivery, master data creation and cleansing, preventative maintenance planning and SAP PM & DMS configuration. He has also performed SAP wellness assessments and recommendations as the Plant Maintenance lead for various companies.

Masterclass Maintenance & Reliability Practitioners

Facilitator : **Michael Eisenbise**

Date : **19 - 23 August 2024**

Timings : **10:00 - 14:00 Eastern Standard Time (EST)**
14:00 - 18:00 Greenwich Mean Time (GMT)

Equipment must be safe, reliable, and process variability must be eliminated. Your employees must be motivated and supported with targeted training and a robust and efficient organizational structure. This online course is designed to heighten the learning experience and to provide an immersive training environment that maximizes the interaction between attendees and the instructor, and between the attendees.

Michael Eisenbise the facilitator for this course has 43 years of maintenance technology and reliability experience. He is a Certified Maintenance and Reliability Professional (CMRP) with the Society for Maintenance and Reliability Professionals Certifying Organization (SMRPCO), a Certified Plant Engineer (CPE) with the Association of Facility Engineers (AFE), a Certified Plant Maintenance Manager (CPMM) with the AFE, and a Certified Reliability Leader (CRL) with the Association of Asset Management Professionals. He is also a registered Professional Engineer (PE) in Florida.

Total Productive Maintenance (TPM)

Facilitator : **Ramesh Gulati**
 Date : **12 -16 August 2024**
 Timings : **08:00 - 12:00 Eastern Standard Time (EST)**
12:00 - 16:00 Greenwich Mean Time (GMT)

The 4 Day Online training sessions will have topics, including the operation and production role, which serves as the first line of defense against failures. It will also explore maintenance best practices, workplace design - 5 S principles, performance metrics such as OEE/TEEP, analysis tools, team and change management, quality control, and safety.

Our expert trainer Ramesh Gulati, PE, CRE, CRL, CAMA, CMRP, CMRT, has been in the maintenance and reliability and asset management field for more than 50 years. Broad background in operations analysis, performance measurement – metrics, plant reliability & maintenance process improvement tools/techniques – CBM/PdM, TPM, RCM etc., and implementation of asset management systems (ISO Certified).

HR Transformation: The Potential of Analytics

Facilitator : **Fermin Diez**
 Date: **26 - 28 August, 2024**
 Timings : **09:00 - 14:00 Eastern Standard Time (EST)**
13:00 - 17:00 Greenwich Mean Time (GMT)

Dr. Fermin Diez, experienced human resources leader with more than 30 years; includes consulting, corporate and academic roles in 40 countries across continents. He is a frequent speaker at regional and global fora on topics related to Compensation, strategic HR, talent management and development, career planning, mergers and acquisitions from an HR perspective, building teams, global HR, education, public sector HR practices and HR Analytics.

MRO Storeroom Best Practices

Facilitator : **Andy Gager**

Date : **23 - 25 October 2024**

Timings : **10:00 - 15:00 Eastern Standard Time (EST)**

15:00 - 20:00 Greenwich Meant Time (GMT)

MRO Storeroom Management is a 3-day online training course designed to assist MRO Storeroom Operations with achieving maximum efficiency and effectiveness. Attendees will learn new methods and techniques to gain an understanding of best practices for well-organized Materials Management and will benefit from our interactive and adult learning techniques, while also receiving a firsthand understanding at developing a world class storeroom operation. Regardless of your level of expertise, this course will provide you with the framework and tools to develop and deploy a best-in-class MRO Program and take full advantage of the best practices and strengths of your organization.

Andy Gager the facilitator of this course is recognized as an industry leading expert in facilitation, global implementations of operations best practices, maintenance systems, and supply chain with over 20 years of industry experiences ranging from warehousing operations to plant management and over 20 years of consulting and facilitating trainings.

Maintenance Best Practices for Leadership & Supervision

Facilitator : **Andy Gager**

Date : **18 -22 November 2024**

Timings : **10:00 - 15:00 Eastern Standard Time (EST)**

15:00 - 20:00 Greenwich Mean Time (GMT)

Join this 5-Day Online Course to enhance your performance and strengthen your workforce by improving your Leadership & Supervisory skills and be confident that you can be successful in meeting the difficult challenges of today's business world. Supervisors are the first line of management in any organization.

Andy Gager the facilitator of this course is recognized as an industry leading expert in facilitation, global implementations of operations best practices, maintenance systems, and supply chain with over 20 years of industry experiences ranging from warehousing operations to plant management and over 20 years of consulting and facilitating trainings. He has worked extensively in the manufacturing, oil & gas, food & beverage, facility management, power gen, pharma, and transportation industries.
